

Valley Adventure Centre – High Development Activities Risk Assessment

Risk Assessment for: High Development Activities	Assessor(s): Alex Dodds	Date: 02/01/2025
---	--------------------------------	-------------------------

Overview of activity/ location/ equipment/ conditions assessed:	High Development activities involve peer belayed climbing on various elements to a height of up to 12m, such as: Peg Pole, Jacob’s Ladder, Crate Stack, Vertical Challenge. There are no more than 4 people at height at any time on the High Development areas. All of these challenges present the same hazards to a participant at height and should be treated as one and the same.
--	---

Generic or specific assessment:		Specific		
Serial	Hazard(s) identified	Persons affected	Existing Controls	Additional Controls
1	Induction/ Safety Brief	All staff and public	Participants must attend a safety brief prior to the activity No person will be allowed to take part unless they can demonstrate that they have fully understood the safety instructions and rules for the centre and activity	See the Safety Brief
2	Slips, trips, falls and personal injury	All staff and public	Obstacles and elements are inspected prior to use. Monthly Inspections are undertaken by trained/experienced staff At the time of booking participants are informed about wearing suitable clothing and footwear for the session. To avoid injury the participants should be briefed before the activity begins. The brief should cover where hands, head and feet should be placed and where injuries may occur and how to avoid them	See the Safety Brief

3	Young persons and vulnerable adults	All staff and public	<p>Additional information is requested before the session in order for any adaptations to be made.</p> <p>Under 16's require a 'Consent Form' signed by a parent or guardian or have a parent/guardian in attendance.</p> <p>The minimum age is 7 years old.</p>	Young persons and vulnerable adults will tend to forget the safety instructions and rules when they are excited. It is essential to repeat the rules at frequent intervals.
4	Health and/ or fitness	All staff and public	<p>Each participant should understand that the activity is physical and mentally challenging</p> <p>All users should be fit enough to undertake the activity and operate within their personal limits.</p> <p>Participants are advised to seek professional assistance if in doubt about the fitness level required for the activity.</p> <p>Participants with current injuries or undergoing medical treatment should consult with the Senior Staff before participating in the activity</p>	See the Safety Brief
5	First aid and medical requirements	All staff and public	<p>Supervising staff have received first aid training.</p> <p>In addition The Duty Manager has a valid first aid award.</p> <p>First aid kits are available in the Tower and the Office</p> <p>An accident reporting record is kept by the Centre Manager.</p> <p>Participants with additional medical requirements such as asthma, inhalers, diabetes etc should make themselves known to supervising staff so that appropriate measures may be taken to ensure the availability of personal medications if required.</p>	<p>It may be impractical for participants to carry personal medications during activity. All personal medications should be immediately available in the 'Tower' or carried by a supervisor if requested.</p> <p>The activity may be stopped if personal medications are required.</p>

6	Alcohol and drug misuse	All staff and public	Any person who appears to be under the influence of alcohol and / or drugs will be asked to leave the site.	
7	Fire and Emergency	All staff and public	<p>The site is 'No Smoking'.</p> <p>Naked flames are not allowed on-site unless as part of the 'Bushcraft' sessions at a designated fire pit.</p> <p>Staff are inducted and trained to respond in the event of a fire.</p> <p>Contact the emergency services by calling 999 or 112 from the office or by mobile phone.</p> <p>There is a mobile reception for most networks on-site.</p>	In the event of a Fire or Emergency all users will be escorted by an instructor to the Emergency Assembly Area which is located next to the water pumping station at the main gate entrance to the centre.
8	Panic or Injury etc.	All staff and public	<p>Every session normally has a minimum 1 Rescuer with a further Rescuer on-site.</p> <p>Rescuers must be trained and assessed to evacuate participants and casualties from all areas of the Aerial Trekking course including unconscious casualties.</p> <p>There are 3 'Rescue Bags' containing the correct evacuation equipment for rescues and lowers from height.</p> <p>Participants are under supervision at all times by a minimum of 2 staff (one instructor, one assistant instructor).</p> <p>Support should initially be from the ground vocally before an Instructor goes on to the course to support a participant</p> <p>Lead Instructors are to be trained and signed off by an ERCA trainer. Assistant instructors are trained in house by the Lead Instructor, Centre Manager or Operations Manager.</p>	See Passive and Active Rescue Procedures in the Aerial Trekking & Powerfan Operating Procedures.

			Assistants must attend sufficient training sessions, and be assessed as competent, before assisting on any session.	
10	Staff and Public entering the activity area during a session	All staff and public	During the site briefing everyone is instructed on the use of helmets within the site.	
11	Weather	All staff and public	All staff and public are to wear suitable footwear and clothing for the conditions Force 7 wind conditions from the south west will halt the activity. Force 8 wind conditions will halt all activities. Heavy rain will halt activities at the discretion of the duty manager. Participants should be briefed to take more care in adverse conditions.	A dynamic risk assessment is made before and during sessions. Participants are briefed on weather conditions as required. The activity can be adjusted as conditions dictate i.e. only use level 1 if windy. Activity will be stopped if necessary.
12	Inadequate personal clothing and/ or footwear	All staff and public	Participants are advised to remove rings and jewellery and are advised to wear sturdy, close-toed footwear. Hair tied back and no objects in pockets.	Spare hair bands should be kept in the Office for use by participants.
14	Equipment failure	All staff and public	Instructors should ensure all PPE equipment is clean, fits properly and conforms to safety regulations. Defective equipment should be quarantined Size and adjust harnesses and helmets to correct fit. Re-adjust equipment as necessary during activity especially after weighting the harness. All equipment should have a pre-use check and be Inspected every 3 months by a suitably qualified or experienced member of staff. Lanyards should be sized to the individual	

			Equipment should be stored in a clean dry environment.	
18	Falling from height	All staff and public	<p>The activity equipment is to be inspected and maintained. Individual elements are to be in good condition and inspected for splinters, wires etc.</p> <p>Participants trained in the use of belay techniques and all ropes are 'tailed' by an instructor. Belayers are attached to ground anchors and lowers are made under Instructors control only.</p> <p>There should never be any slack in the ropes, as this would cause shock loading.</p> <p>Advanced Instructors can supervise up to 4 belayers depending on experience; Instructors up to 2 belayers and Assistant Instructors 1 belayer.</p> <p>There will normally be two instructors supervising 2 belayers each.</p> <p>The crate stack challenge requires the crates to be facing a certain direction, as displayed by the box shape marked on the platform. This means that the crates will fall in the correct direction away from participants and not present a hazard to the belayers.</p>	<p>Participants should be able to pull themselves back onto the course in the event of a slip.</p> <p>ERCA instructors are trained and assessed to rescue participants from any part of the ropes course using short pulley hoists to regain participants back onto the course and also how to lower participants to the ground using recognised ERCA rescue procedures.</p> <p><i>*See Passive and Active Rescue Procedures in the Aerial Trekking & Powerfan Operating Procedures.</i></p>
	Injury from falling crates		The helmet will protect the head. Be aware of ropes and other participants that are next to you. Participants are advised to keep well clear of the area in the event of falling objects, such as Pegs or Crates. If participants need to approach the activity, Instructors must ensure that everyone is aware and looking for potential injury.
